

Guardian

The electronic witnessing system using dual identification label technologies, designed for simplified sample traceability for patients and IVF clinics.

Customisable System

It seamlessly adapts to the workflow of your lab, rather than requiring your lab to adapt to it.

Seamless Integration

Hardware has a small footprint, is portable, and enables seamless implementation.

Diverse Workflow Display

ID-check status and workflow can be viewed from day zero to day seven.

GUARDIAN: VERIFIES PATIENT ID ACROSS ALL STEPS AND LOCATIONS

Seamless Traceability

Write electronic information and print visual labels simultaneously on RFID tags.

Flexibility Delivered

Select RFID or QR codes where needed.

Undisruptive Installation

No physical hardware change to existing equipment and lab set up.

Mobility Built-in

Mobile witnessing anytime and everywhere.

Transparency Connected

Mismatches distributed to PDA and dashboard for full visibility.
