

Guardian

The electronic witnessing system where all labels are human readable and you can track chain of custody anytime, anywhere in your IVF clinic.

Customizable System

We adapt to your workflow.
Instead of you adapting to us.

Seamless Integration

Eliminates lab intrusion/disruption,
plug-n-play system, small footprint,
and portable PDAs.

Workflow Display

Real-time workflow view with
patient mis-match (red), completion
(green) , and incomplete (grey)
statuses.

GUARDIAN: VERIFIES PATIENT ID ACROSS ALL STEPS AND LOCATIONS

Seamless Traceability

User experience: easily modify work-flow and make changes based on access.

Real-time mismatch alerts are red, incomplete patients are grey, and completed patients are green.

Flexibility Delivered

Choose your structure, with unlimited scans (zero upcharges) and unlimited witnessing. Easy to read and see workflow on any handheld or computer screen. Alerts are distributed to PDA and dashboards for full visibility.

Undisruptive Installation

Customize your server to your needs and patient flow.

Plug and play.

Zero lab restructuring everything works with handheld scanners
